Completed online course covering IoT architecture, sensors, communication protocols, smart devices, and real-world IoT applications with Elite certification (88%).

- **Problem Solving Certification – HackerRank**

Demonstrated proficiency in data structures, algorithms, and logical reasoning through coding challenges.

TECHNICAL SKILLS

- C++
 - Java
 - Python
 - Object-Oriented Programming (OOP)
 - Data Structures & Algorithms
 - Basics Of Cloud Computing
-

PROJECTS

Music Detector: Real-Time Song Identification

The primary goal of Music Detector is to provide users with a convenient and reliable means to identify unknown music in real-time. Whether you're in a coffee shop, at a party, or watching a video, Music Detector can help you discover new music.

AI-Powered Micro-Investment Suggestions: INNOVEST

The AI-Powered Micro-Investment Suggestions platform provides users with personalized financial advice and educational support . Based on user inputs like age, gender, and investment range, the platform recommends customized investment schemes, including government-backed options. This combination of real-time education and personalized scheme suggestions helps users make informed financial decisions and access opportunities suited to their unique profiles.
